

**Mondaine Official Swiss Railways Watch Limited and numbered edition 2003
"7 days tour" – Discover Switzerland by rail in seven days**

One of the most pleasant, enjoyable and comfortable ways to discover Switzerland is by train, providing a chance to appreciate the hidden treasures and extraordinary diversity of this small territory.

The special numbered edition 2003 of the Mondaine Official Swiss Railways Watch, the "7 Days Tour", invites you on a journey by suggesting 7 one-day rail trips. The small round brochure enclosed with the watch looks and works like a parking disk. By rotating it, you will find 7 suggestions for train journeys each enabling you to visit one of our most beautiful tourist attractions.

The highly legible dial of the "7 Days Tour" is equipped with a date window at 3 o'clock and the date appears in a half-moon aperture in the lower half of the dial.

The Mondaine Swiss Railways "7 Days Tour" watch is available in two versions: with white dial and polished steel case, or with black dial and brushed matt steel case. The new "7 Days Tour" is issued in a limited edition of 5,000 watches numbered on the case-back.
